MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XX

OTTAWA, JUNE, 1945

No. 6

Dominion Statistician: S. A. Cudmore, M. A. (Oxon.), F.S.S., F.R.S.C. Chief, Business Statistics Brange: Sydney B. Smith, M.A.

ECONOMIC CONDITIONS IN MAY

The rise in the average of six strategic economic factors in May over the preceding month was mainly due to the increase in the deposit liabilities of the chartered banks. The advance in common stock prices was continued in the month under review, an upward trend having been shown since mid-year 1942. Wholesale and Dominion bond prices were steady in May, the general index of commodity prices having shown remarkable stability since the later months of 1943. Speculative trading on the Stock Exchanges continued at a high level,

while recession was shown in productive operations.

The index of the physical volume of business recorded recession in May in contrast to the minor advances of the two preceding months. The trend has been downward since the early months of 1944 when the historical maximum was reached. The general index of employment showed further recession at the beginning of April when there had been a decline for four consecutive months. The historical maximum was reached at the first of December, 1943. The recession during 1944 was of a decidedly minor character but the industrial labour force at the present time is somewhat below the extremely high levels obtaining around the beginning of last year. The national income, on a tentative footing, which had been \$3,712 million in the first five months of 1944 receded to \$3,618 million in the same period of the present year. The decline, consequently, was limited to 2.5 p.c.

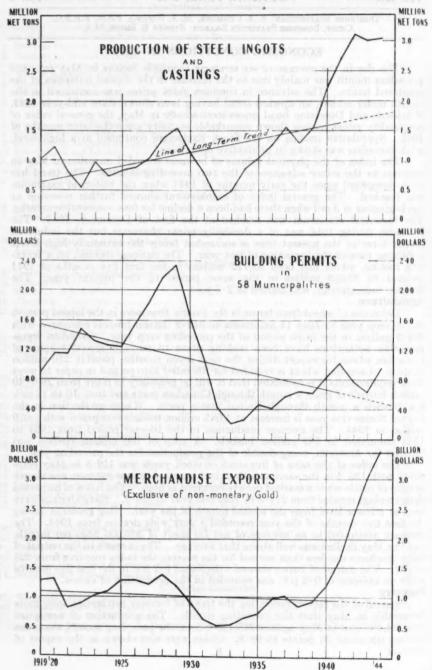

Deliveries of wheat from farms in the Prairie Provinces in the lapsed portion of the crop year to June 14 amounted to 312·2 million bushels compared with 254·3 million in the same period of the preceding crop year. Canadian transportation authorities have been making plans to move a record volume of Canadian wheat for export during the next seven months, possibly 250 million bushels. Canadian wheat is required for liberated Europe and in order to meet these requirements it is estimated that it will be necessary to move from 28 to 40 million bushels of grain a month through Canadian ports and from 10 to 12 million bushels a month through United States ports. Wheat production in the United States this year is forecast at 1,085 million bushels compared with 1,079 million in 1944. The average production in the 10-year period from 1934 to 1943 amounted to 789 million bushels. A crop of 100 million bushels was forecast for Australia, being double of the production for the preceding year.

The index of the sales of live stock on stock yards was 119.8 in May compared with 125.3 in the same month of last year. A minor increase was shown in sales of cattle while a marked decline occurred in hogs. The index of inspected slaughterings receded from 212.8 in May last year to 150.3. Slaughterings have been at a lower level from the second month of the year. Hog gradings during the first five months of the year recorded a very wide decline from 1944. The decrease amounted to an average of not far short of 300,000 hogs per month, and the May decline was well above that average. The increase in the output of dairy products was less than normal for the season, the index receding from 223 to 162. The output of butter showed a decline of 0.7 p.c. in the first five months while an increase of 9.2 p.c. was recorded in the production of cheese.

Forestry

Several of the factors indicating the trend of forestry production were more favourable in May than the preceding month. The production of newsprint was 264,464 tons in May against 245,429 tons in the preceding month, the index moving up about $3\frac{1}{2}$ points to $98\cdot 8$. Gains were also shown in the export of 37336-2

FACTORS INDICATING THE TREND OF INVESTMENT EXPENDITURES

woodpulp and shingles while the export of planks and boards showed contraseasonal recession. It was announced that Canadian mills will increase its monthly supply of newsprint to the United States from 200,000 to 220,000 tons a month beginning July 1. It was also announced that paper shipments from Canada and the United States to Europe would be stopped and that European publishers would be supplied entirely with Scandinavian newsprint.

Electric Power

During the first four months of the present year, the total output of the central electric stations was 13,668,000,000 kilowatt hours compared with 13,619,000,000 in the same period last year. Water turbine installations have increased from 143,156 horsepower in 1900 to 10,283,763 horsepower at the latest date for which statistics are available. The war has demonstrated the strength of Canada as an industrial country and the wide and favorable distribution of water-power resources and the versatility of low-cost hydro-electric power developed from these resources has been vital in making such an industrial position possible. In the post-war period, water power should continue as an outstanding factor in the future development of the country's resources. In 1944 a net increase of 69,250 horsepower in hydro-electric development was recorded, wartime expansion in facilities having been completed in previous years. Manufacturing

The decline in manufacturing production, according to the index, was 9.4 p.c. from the first four months of 1944. The index of manufacturing employment receded 5.6 p.c. in the same comparison, prices of manufactured goods having been a trifle higher. Wheat flour production in the first quarter was 8,284 thousand barrels compared with 8,345 thousand in the same period of last year. The output in April was the highest ever recorded for that month.

Operations of the Canadian cotton mills in May were somewhat below the same month of last year. The monthly bale openings at 33,159 were 7.3 p.c. less. For the first five months of the year total bale openings at 167,205 showed a reduction of 5.6 p.c. Activity in the secondary iron and steel industry showed recession in the latest available month. The increases in the output of steel ingots and of pig iron over the first four months of 1944 were 6.2 p.c. and 2.4 p.c. respectively.

Transportation

The gross operating revenue of the Canadian National Railway was \$174.2 million in the first five months of the present year against \$176.2 million in the same period of 1944. The total for the Canadian Pacific Railway during the same period was \$186.7 million compared with \$187.9 million last year. The revenue of the Canadian National Railway showed a gain in May over the same month of last year while a decline of 2.5 p.c. was shown in the earnings of the Canadian Pacific.

Finance

Current loans of the chartered banks amounted to \$1,023 million at the end of April compared with \$867 million on the same date of last year. The security holdings of the banks which had been \$3,390 million last year rose to \$3,504 million at the end of April this year. Previous to the offering of each war loan, total deposits in Canadian chartered banks have set successive new records and each war loan has established a new record in the total amount of money raised. The monthly statement of the banks as at April 30 showed total notice and demand deposits at a new all-time high of \$4,848 million, exceeding by \$189 million the previous record set at the end of March, this year, and exceeding the year ago comparison by \$606 million.

Dominion income tax and customs and excise collections yielded a total of \$263.6 million in May, a decline of \$3.7 million compared with the same month of 1944. Income tax collections at \$151.6 million showed a recession of \$26.5 million largely as a result of the refundable portion being no longer collected. The customs-excise revenue of \$112 million represented an increase of \$22.8

million.

as the low record for third perfect which make, and to the say a survey rate									in Jin	1001				belief of granted for a

Total sales in Canada's eighth Victory Loan campaign reached a record total of \$1,568,927,350, the objective having been \$1,350,000,000. An increase of \$51·3 million was shown over the previous record total reached in the seventh Loan drive when the objective was \$1,300,000,000. Purchases by individuals were \$836·3 million or \$69·9 million more than during the seventh loan. The average purchase of all individuals was \$263·6, an increase of \$31·4 over the last loan. Purchases by large buyers, including corporations, totalled \$732·6 million.

National Expenditures

Investment expenditures consist mainly of construction, the purchase of producer's durables, the international credit balance and the change in inventories. The chart on page 4 illustrates the long-term trend of three factors bearing on investment expenditures, the movement being shown for the output of steel ingots, building permits in 58 municipalities and merchandise exports exclusive of non-monetary gold.

Construction contracts awarded in the first five months of 1945 amounted to \$116.9 million against \$115.4 million in the same period of last year. Awards in May amounted to \$38.3 million compared with \$31.7 million in the same month last year. Contracts placed in April and May were in excess of the levels

established last year.

During the first five months of 1945, exports of merchandise produced in Canada were valued at \$1,395.5 million compared with \$1,403 million in the same period of 1944, a decline of one-half of one per cent. Agricultural exports headed the list with a May total of \$176.9 million compared with about \$91

million in May last year.

Retail sales during the first four months of this year averaged 8 p.c. above the same period of 1944 and were 46 p.c. greater than in the same four months of 1941. Sales of Canadian department stores were practically unchanged in April of this year compared with last year but were 18 p.c. below the level in March of this year. The high point in the third month of this year was due to unusual circumstances including the early date of Easter and the unseasonably warm weather throughout the month. Wholesale sales of food products in April this year considerably exceeded the volume recorded in the same month of 1944. The larger wholesale grocery houses reported an increase of 10 p.c. in this comparison.

Income Payments

Industrial employment throughout Canada has shown curtailments since the beginning of the year. Most of the recession took place in manufacturing and logging from which some 7,100 and 12,700 persons, respectively, were released by the co-operating farms. The contraction in manufacturing as a whole was contra-seasonal. The largest decline was in iron and steel. The per capita average weekly earnings were given as \$32.00 in the week of April 1, being 81 cents less than at March 1 which was a new high point in the current movement.

Claims registered for unemployment insurance benefit during the month of April totalled 8,430 as compared with 13,307 in the preceding month and 6,463 in the corresponding month of last year. A total of 22,995 persons received one or more benefit payments in April, having been paid a total of \$591,265 for

304,102 compensated unemployed days.

The dividends paid by Canadian corporations in the first five months of 1945, according to an unofficial computation, were \$91.4 million against \$90.1 million in the same period of last year, representing a gain of 1.4 p.c.

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XX

OTTAWA, JUIN 1945

Nº 6

STATESTICIEN DU DOMINION: S. A. CUDMORE, M.A. (OXON.), LL.D. (TOR.), F.S.S., F.R.S.C. CHEF, BRANCHE DES STATISTIQUES ÉCONOMIQUES: STONET B, SMITE, M.A.

SITUATION ÉCONOMIQUE EN MAI

L'avance de la moyenne des six principaux facteurs économiques en mai comparativement au mois précédent est surtout attribuable à l'augmentation des dépôts aux banques à charte. La hausse des actions ordinaires se poursuit en mai et, cela, depuis le milieu de l'été de 1942. Les prix de gros et les obligations du Dominion sont stables en mai; l'indice général des prix des denrées fait preuve d'une stabilité remarquable depuis les derniers mois de 1943. Les opérations spéculatives continuent de se maintenir à un niveau élevé, tandis que

les opérations productives ralentissent.

L'indice du volume physique des affaires accuse en mai un recul qui contraste avec les faibles avances des deux mois précédents. Cet indice tend à décliner depuis les premiers mois de 1944, alors qu'il a atteint un maximum. L'indice général de l'emploiement rétrograde encore au début d'avril, pour le quatrième mois consécutif. Le maximum historique a été atteint le 1er décembre 1943. Le recul en 1944 a été nettement moins prononcé, mais les effectifs des industries à l'heure actuelle sont un peu inférieurs au niveau extrêmement élevé qu'ils ont atteint vers le début de l'an dernier. Le revenu national, qui avait été estimé à \$3,712,000,000 les cinq premiers mois de 1944, diminue à \$3,618,000,000 la même période de cette année. Le déclin se limite donc à 2·5 p.c.

Agriculture

Du début de la campagne au 14 juin les cultivateurs des Provinces des Prairies livrent 312,200,000 boisseaux de blé, à rapprocher de 254,300,000 la même période de la campagne précédente. Les autorités canadiennes du transport ont projeté de transporter une quantité énorme de blé canadien en vue de l'exporter durant les sept prochains mois, probablement 250,000,000 de boisseaux. L'Europe libérée a besoin de blé canadien; pour satisfaire ces besoins, il est estimé qu'il faudra transporter de 28,000,000 à 40,000,000 de boisseaux de grain par mois par les ports canadiens et de 10,000,000 à 12,000,000 de boisseaux par mois par les ports des Etats-Unis. On prévoit que la production de blé aux Etats-Unis cette année sera de 1,085,000,000 de boisseaux contre 1,079,000,000 en 1944. La production moyenne de la période de 1934 à 1943 a été de 789,000,000 de boisseaux. On s'attend que la récolte de l'Australie s'établisse à 100,000,000 de boisseaux, soit le double de la récolte de l'année précédente.

L'indice des ventes de bestiaux aux enclos se place à 119·8 en mai comparativement à 125·3 le même mois de l'an dernier. Les ventes de bêtes à cornes augmentent un peu, tandis que celles de porcs accusent un déclin marqué. L'indice des abatages inspectés recule à 150·3 contre 212·8 en mai l'an dernier. Les abatages diminuent depuis le deuxième mois de l'année. Le classement des porcs au cours des cinq premiers mois de cette année est beaucoup moins considérable qu'en 1944. La diminution atteint une moyenne qui n'est pas loin de 300,000 porcs par mois, et le déclin en mai est bien supérieur à cette moyenne. L'augmentation de la fabrication de produits laitiers est moins que normale pour la saison, l'indice reculant à 162 contre 223. La production de beurre décline de 0·7 p.c. les cinq premiers mois, tandis que la production de

fromage augmente de 9.2 p.c.

Industrie forestière

Plusieurs des facteurs traçant l'orientation de la production forestière font meilleure figure en mai que le mois précédent. La production de papier à journal s'élève à 264,464 tonnes en mai contre 245,429 le mois précédent; l'indice gagne 3.5 points et se place à 98.8. Les exportations de pulpe de bois et de

Progents des necteurs traceurs transmittent de la production forestlere from milleure figure en mai que le mois précédent. La production de papier à council s'élève à 264,464 hannes en mai contre 245,429 le mais précédent; l'indice magne 3-5 points et se place à 98-8. Les exportations de pulpe de bots et de

bardeaux augmentent, tandis que celles de madriers et planches laissent voir une diminution hors de saison. Il a été annoncé que les moulins canadiens augmenteront leurs approvisionnements de papier à journal aux Etats-Unis de 200,000 à 220,000 tonnes par mois à compter du 1er juillet. On a également annoncé que les expéditions de papier du Canada et des Etats-Unis à l'Europe cesseraient et que les éditeurs européens seraient entièrement approvisionnés en papier à journal de la Scandinavie.

Energie électrique

Les centrales électriques produisent 13,658,000,000 de kilowatt-heures au cours des quatre premiers mois de cette année, à rapprocher de 13,619,000,000 la même période de l'an dernier. Les installations de turbines hydrauliques ont augmenté de 143,156 h.p. en 1900 à 10,283,763 h.p. à la dernière date pour laquelle les statistiques sont connues. La guerre a révélé la puissance du Canada comme pays industriel; les ressources hydrauliques considérables et favorablement réparties, ainsi que les multiples usages auxquels se prête l'énergie électrique à bas prix fournie par ces ressources, ont joué un rôle de première importance en rendant possible une telle situation industrielle. Après la guerre, l'énergie hydraulique devrait continuer d'être un facteur remarquable du développement futur des ressources du pays. En 1944 les développements hydro-électriques accusent une augmentation nette de 69,250 h.p., l'expansion du temps de guerre s'étant produite les années précédentes.

La production manufacturière, d'après l'indice, décline de 9.4 p.c. au regard des quatre premiers mois de 1944. L'indice de l'emploiement dans les manufactures recule de 5.6 p.c. dans le même ordre de comparaison, tandis que les prix des produits ouvrés montent un peu. La production de farine de blé s'établit à 8,284,000 barils le premier trimestre contre 8,345,000 la même période de l'an dernier. La production d'avril cette année est la plus considé-

rable jamais enregistrée pour ce mois.

Les opérations des filatures canadiennes de coton en mai sont un peu moins considérables qu'au cours du même mois de l'an dernier. Il s'ouvre 33,159 balles pendant le mois, diminution de 7·3 p.c. Pendant les cinq premiers mois de l'année il s'ouvre 167,205 balles, diminution de 5·6 p.c. L'activité ralentit dans les fonderies et les aciéries le dernier mois connu. La production d'acier en lingots et de fonte en gueuse augmente de 6·2 p.c. et de 2·4 p.c. respectivement au regard des quatre premiers mois de 1944.

Transports

Les recettes brutes d'exploitation du Canadien National se placent à \$174,-200,000 les cinq premiers mois de l'année courante contre \$176,200,000 la même période de l'an dernier; celles du Pacifique Canadien s'établissent à \$186,700,-000 pendant la même période comparativement à \$187,900,000 l'an dernier. Les recettes du Canadien National augmentent en mai au regard du même mois de l'an dernier, tandis que celles du Pacifique Canadien diminuent de 2·5 p.c. Finance

Les prêts courants des banques à charte s'élèvent à \$1,023,000,000 à la fin d'avril contre \$867,000,000 la même date de l'an dernier. Le portefeuille des banques, qui était de \$3,390,000,000 l'an dernier, passe à \$3,504,000,000 à la fin d'avril cette année. Avant chaque emprunt de guerre, les dépôts aux banques à charte canadiennes avaient établi de nouveaux records successifs, et chaque emprunt de guerre a touché une nouvelle cime en fait de montant global recueilli. L'état mensuel des banques au 30 avril indique que les dépôts à terme et à demande touchent un nouveau sommet de \$4,848,000,000, soit \$189,000,000 de plus que le maximum antérieur à la fin de mars cette année et \$606,000,000 de plus que le 30 avril l'an dernier.

L'impôt fédéral sur le revenu, la douane et l'accise rapportent \$263,600,000 en mai, diminution de \$3,700,000 au regard du même mois de 1944. Les perceptions d'impôt sur le revenu se placent à \$151,600,000 et déclinent de \$26,-

500,000, surtout parce que la partie remboursable n'est plus perçue. recettes de la douane et de l'accise s'élèvent à \$112,000,000, augmentation de

\$22,800,000.

Lors du huitième emprunt canadien de la victoire, les ventes ont rapporté \$1,568,927,350, alors que l'objectif était de \$1,350,000,000. L'augmentation est de \$51,300,000 par rapport au record antérieur établi lors du septième emprunt, dont l'objectif était de \$1,300,000,000. Les particuliers en ont acheté pour \$836,300,000, soit \$69,900,000 de plus que lors du septième emprunt. Les particuliers en ont acheté en moyenne pour \$263.60, ou pour \$31.40 de plus que lors de l'emprunt précédent. Les gros souscripteurs, y compris les corporations, en ont acheté pour \$732,600,000.

Dépenses nationales

Les dépenses en immobilisations comprennent principalement la construction, l'achat d'articles durables pour la production, le solde créditeur du commerce international et les changements dans les inventaires. Le graphique de la p. 4 illustre la tendance à long terme de trois facteurs de dépenses en immobisations; il y est question de la production d'acier en lingots, des permis de bâtir dans 58 municipalités et des exportations de marchandises (à l'exclusion de l'or non monétaire).

Les contrats de construction accordés pendant les cinq premiers mois de 1945 s'élèvent à \$116,900,000 contre \$115,400,000 la même période de l'an dernier. Les contrats adjugés en mai cette année s'établissent à \$38,300,000 comparativement à \$31,700,000 le même mois de l'an dernier. Les contrats placés en avril et en mai sont supérieurs à ce qu'ils ont été l'an dernier.

Les exportations de produits canadiens ont une valeur de \$1,395,500,000 les cinq premiers mois de 1945, à rapprocher de \$1,403,000,000 la même période de 1944, diminution de 0.5 p.c. Les exportations de produits agricoles sont en tête avec un total de \$176,900,000 en mai cette année contre \$91,000,000

environ en mai l'an dernier.

Les ventes de détail au cours des quatre premiers mois de cette année excèdent en moyenne de 8 p.c. celles de la même période de 1944 et de 46 p.c. celles des quatre premiers mois de 1941. Les ventes des magasins à rayons au Canada en avril n'offrent à peu près pas de changement au regard du même mois de l'an dernier, mais elles diminuent de 18 p.c. par rapport à celles de mars cette année; le niveau élevé des ventes le troisième mois de cette année a été dû à des circonstances exceptionnelles, dont la date de Pâques et la chaleur hors de saison durant le mois. Les ventes de produits alimentaires en gros en avril cette année sont beaucoup plus considérables qu'au cours du même mois de 1944. Les grandes épiceries en gros rapportent une augmentation de 10 p.c. dans cet ordre de comparaison.

Paiements de revenu

L'emploiement industriel dans tout le Canada diminue depuis le début de La majeure partie de la diminution se produit dans l'industrie manufacturière et l'abatage du bois, qui mettent à pied 7,100 et 12,700 personnes respectivement. La contraction dans l'ensemble de l'industrie manufacturière est hors de saison. Le plus grand déclin se produit dans le groupe du fer et de l'acier. Les gains hebdomadaires moyens per capita sont de \$32.00 la semaine du 1er avril, soit 81 cents de moins que la nouvelle cime atteinte le 1er mars.

Les réclamations de prestation d'assurance-chômage s'établissent à 8,430 en avril, comparativement à 13,307 le mois précédent et 6,463 le mois correspondant de l'an dernier. En avril, 22,995 personnes reçoivent en prestation un montant total de \$591,265 pour 304,102 jours de chômage compensés.

D'après un calcul officieux, les dividendes payés par les corporations canadiennes s'élèvent à \$91,400,000 les cinq premiers mois de 1945, au regard de \$90,100,000 la même période de l'an dernier, augmentation de 1.4 p.c.

BUREAU FÉDÉRAL DE LA STATISTIQUE, 30 juin 1945.
